Abouelwafa Choaib

Software Developer

Protfolio: choaibabouelwafa.me

As a computer scientist, I am highly motivated to pursue my passion for web development. As a front-end developer, I have experience working with HTML, CSS, JavaScript, ReactJS, NextJS, and Svelte. I look forward to exploring new challenges to improve my skills and expand my knowledge in this field.

Education

1337 SCHOOL (42 NETWORK)

Computer Science - Khouribga

ISTICG

Associate's degree, Computer Science - BERRECHID

Highschool degree

Scientific option - BERRECHID

Expertise

- JavaScript / TypeScript
- React JS
- Next JS
- Svelte
- Docker
- HTML5 / CSS
- C / C++ / C#
- Git

Languages

- Arabic
- English
- French

Experience

Front-end Developer — 6 months

Internship - SEKERA

I worked on a website using React JS - Next JS with Material UI
- Plan and Design
- Implementing Forms with Steps
- Form validation with formik
- Staff schedule
- Testing and Refinement

Technologies: NextJS/Typescript - Tailwind CSS - Git

Front-end Developer — 12 months

Freelance - X start-up

I worked on 5 projects using React JS and Next JS with Typescript, Tailwind CSS, and Mantine UI:
- Create a SEO friendly app
- Create Template App
- Create Custom Components/Containers in Storybook
- Create a Liveness check with the camera using TensorFlow
- Reviewing code
- Create custom UI for Keycloak authentication

Technologies: ReactJS/Typescript - NextJS/Typescript - Tailwind CSS - Mantine UI - Tensorflow - Git

Projects

FT_Transcendence

web platform with ping-pong Game and Chat developed with NextJS/NestJS/PostgreSQL
- Login page with 42infra.
- Profile Page to show state, leaderboard and match history.
- Live Games page to watch current played games.
- Chat with friends directly or join channels channels.
- Game page to play ranked or classic match.

Technologies: NestJS/Typescript - Socket.IO - Git

WebServ

- Socket programming with C++.
- Create multiple servers listening on different ports.
- Handle multiple client requests.

Certifications

React JS: The Complete Guilde incl Hooks, React Router, Redux
